Two Decades of Spice Expertise from South India

Aromas and Flavors International (AFI / ARFLINT) was founded in 2003 by I.G. Kumar in Erode, Tamil Nadu. Privately held and family-owned, AFI has grown from a regional spice supplier into a certified exporter of bulk culinary pastes and dry spices, trusted by food manufacturers, importers, and HoReCa distributors across the GCC, EU, USA, and Southeast Asia.

Every product is manufactured in a single, fully certified facility, holding FSSC 22000, Halal, FSSAI, HACCP, and GMP certifications, so buyers sourcing multiple products can consolidate to one supplier, one audit trail, and one shipment.

White Sesame	<i>Sesamum Indicum</i>

Garlic Paste

Allium Sativum

PRODUCT OVERVIEW

Our Bulk Garlic Paste is manufactured from naturally sourced, farm-fresh garlic (*Allium Sativum*), carefully selected for pungency, color, and consistency to meet the demanding specifications of international food processors, HoReCa distributors, and retail private-label brands. Each batch begins with hand- and machine-sorted garlic bulbs that are depodded, thoroughly washed to remove field residue, and blanched to stabilize color and reduce microbial load while preserving the characteristic sharp aroma and flavor garlic is prized for.

BOTANICAL NAME

Allium Sativum

PACKING

Ginger Paste

Zingiber Officinalis

PRODUCT OVERVIEW

Our Bulk Ginger Paste is produced from farm-fresh ginger rhizomes (*Zingiber Officinalis*), selected for their pungency, aromatic intensity, and natural oil content. Each batch undergoes careful sorting to remove damaged or substandard rhizomes, followed by thorough washing to eliminate soil and field contaminants before the ginger is blanched to stabilize color, reduce microbial load, and lock in the characteristic warm, spicy aroma that defines high-quality ginger.

Ginger Garlic Paste

Allium Sativum + Zingiber Officinalis

PRODUCT OVERVIEW

Ginger Garlic Paste is one of the most widely demanded base ingredients in global food manufacturing, combining two of the most flavor-intensive aromatics, garlic (*Allium Sativum*) and ginger (*Zingiber Officinalis*), into a single, ready-to-use blend. Our paste is produced from naturally sourced, farm-fresh garlic and ginger that are individually depodded, sorted, and washed before being blanched together to stabilize color, control microbial load, and preserve their combined pungency and aroma profile.

Green Chilli Paste

Capsicum Annum L

PRODUCT OVERVIEW

Our Bulk Green Chilli Paste is manufactured from naturally sourced, farm-fresh green chillies (*Capsicum Annum L*), selected for consistent heat level, vibrant green color, and aromatic intensity. Each batch begins with careful stalk removal and sorting to eliminate damaged or overripe pods, followed by thorough washing to remove field residue and blanching to stabilize color, reduce microbial load, and lock in the chilli's characteristic pungency.

Red Chilli Paste

Capsicum Annum L

PRODUCT OVERVIEW

Our Bulk Red Chilli Paste is manufactured from naturally sourced, farm-fresh red chillies (*Capsicum Annum L*), selected at full ripeness for deep red color, robust heat intensity, and concentrated aroma. Each batch begins with stalk removal and careful sorting to eliminate damaged or underripe pods, followed by thorough washing to remove field residue before the chillies are ground to a smooth, consistent finesse that preserves their vivid color and pungency.

Green Jalapeño Paste

Capsicum Annum L (Jalapeno Cultivar)

PRODUCT OVERVIEW

Our Bulk Green Jalapeno Paste is manufactured from naturally sourced, farm-fresh green jalapeno chillies (*Capsicum Annum L*), selected for their distinctive moderate heat, bright green color, and signature grassy, slightly tangy flavor profile that distinguishes jalapenos from other chilli varieties. Each batch is carefully sorted to remove damaged or inconsistent pods, then thoroughly washed to eliminate field residue before being ground to a smooth, consistent finesse.

Red Jalapeño Paste

Capsicum Annum L (Jalapeno Cultivar)

PRODUCT OVERVIEW

Our Bulk Red Jalapeno Paste is manufactured from naturally sourced, fully ripened red jalapeno chillies (*Capsicum Annum L*), selected for their deep red color, smoky-sweet undertone, and moderate heat that intensifies as the jalapeno matures from green to red. Each batch is carefully sorted to remove damaged or inconsistent pods, then thoroughly washed to eliminate field residue before being ground to a smooth, consistent finesse that preserves the chilli's distinctive ripened flavor profile.

Tamarind Paste

Tamarindus Indica L

PRODUCT OVERVIEW

Our Bulk Tamarind Paste is manufactured from naturally sourced, farm-fresh tamarind (*Tamarindus Indica L*), selected for its characteristic tangy-sweet flavor, deep brown color, and high pulp concentration. Each batch undergoes careful sorting to remove fibrous material, seeds, and shell fragments, followed by thorough washing and controlled processing to achieve a smooth, consistent paste finesse that retains the fruit's natural acidity and signature taste.

Food Safety You Can Trade On

FSSC 22000

The Food Safety System Certification 22000 is the highest-tier international food safety management standard, recognized and required by major retail chains, food multinationals, and import authorities in the EU and US.

Halal Certification

AFI's products are Halal certified, enabling compliant supply to GCC nations, Southeast Asian markets, the UK Muslim consumer segment, and all markets where Halal compliance is a procurement prerequisite.

FSSAI

Issued by India's Food Safety and Standards Authority, FSSAI certification is a mandatory compliance for all food manufacturers and exporters operating in India and a baseline trust signal for international buyers

HACCP

Hazard Analysis and Critical Control Points (HACCP) is a systematic, science-based approach to identifying and controlling food safety hazards. AFI's HACCP system covers every stage from raw material intake to

GMP (Good Manufacturing Practices)

GMP certification confirms that AFI's facility, equipment, personnel hygiene, and production processes meet established standards for food manufacturing, a requirement for export to EU, US, and most regulated

Vegan, Vegetarian & Kosher Friendly

All AFI products are 100% plant-based, free from animal-derived ingredients, and suitable for vegan, vegetarian, and Kosher dietary requirements, expanding our products' eligibility across diverse global

USDA / FDA / EU Import Ready

AFI's product formulations, documentation, and traceability systems are aligned with US FDA, USDA, and EU import requirements. Our compliance team works proactively with buyers to prepare all necessary certificates

Let's Start a Conversation

We respond to all B2B inquiries within 24 business hours.
